Cursor Lock Free

Cursor Lock Crack For Windows - Cursor Lock is a program that allows you to confine the cursor to a specific area. Besides, you will be able to change the area without losing focus. This is a very simple program, which doesn't contain more than 3 options in a menu. Furthermore, the Cursor Lock GUI is based on a tabbed interface, which enables you to get to the respective item faster. Consequently, Cursor Lock is a great tool, which enables you to keep the cursor within an area and enable you to focus on the game you have selected. Cursor Lock has the ability to handle multiple monitors. In addition, the icon is also easy to locate on your desktop, making the program very easy to manage. Moreover, since it doesn't contain quite a lot of options, the user interface is also easy to grasp. Lastly, Cursor Lock is an easy to use tool, which gives you the freedom to do other tasks without losing focus in the game in which you previously captured the cursor. How useful was this post? When you ask for a refund you're saying that you didn't get what you paid for. Reviews CURSOR LOCK REVIEW by sam This is a good utility. But many people don't know how to use it. There were some major things it needed improving for users. Like a really good description of the features of this program. Another improvement would be to have more than two monitors. Full review here Posted on February 2, 2008 by sam Email: sam@nhkjournal.com Download Cursor Lock Rating: Good You have to set a hotkey to lock the mouse cursor to a certain position on the screen with Cursor Lock. You can have it locked to the left or the right edge of your screen. I have to admit that I am not the most savvy user. But Cursor Lock does have more than enough features to fit into anyones handbook. It is quite easy to use. However you have to have an internet connection to download the latest updates. The only real drawback to this program is that you only have two monitor support. Rating: Excellent Posted on September 22, 2007 by mike Email: revl5z@aol

What's New in the Cursor Lock?
