iPhone Backup Extractor is what the name says, one solution among many for extracting data from your damaged or defective iPhone. The developer states it is compatible with all existing iPhone devices and iOS versions. You will need to have your iPhone connected to your PC and all subsequent drivers installed in order for everything to behave and work as planned. Once your device is indeed recognized by the app, you can proceed to extract whatever information it is you need from your device. Modern application The program itself is indeed modern. Options are easy to reach and identify. If all drivers and connections are done correctly, the app immediately recognizes your device. IMEI is displayed, as well as firmware version and product model. You can check the contents of your device within the program's interface. You gain access to these through various sectors of the app, among which: Overview, Preview Mode, Expert Mode, and App View. Useful features The best option out of all the given ones is by far Expert Mode. Here, one can view files and folders together with their access paths. You can extract specific files you wish to gain access to, avoiding a plethora of useless data that makes finding what you need harder. It is much more precise in this mode than in the others, but as the name says, it requires a bit more expertise. Some other features include the ability to recover or reset PIN restrictions applied to the handset, erase location data, or completely reset the device. If specific security measures have been applied to the device, the app might not be able to remove them if they are not only locally effective. The device serial number can also be viewed from within the app. Safe to say that iPhone Backup Extractor is yet another program dedicated to solving lots of problems tied to the Apple universe. // // SnapKit // // Copyright (c) 2011-Present SnapKit Team - // // Permission is hereby granted, free of charge, to any person obtaining a copy // of this software and associated documentation files (the "Software"), to deal // in the Software without restriction, including without limitation the rights // to use, copy, modify, merge, publish, distribute, sublicense, and/or sell // copies of the Software, and to permit persons to whom the Software is // furnished to do so, subject to the following conditions: // // The above copyright notice and this
