Aesthetics The basic interface of AutoCAD resembles that of a sheet-metal press, with a main window into which you place drawing and object data. To create a drawing, use the standard drawing commands. For example, to create a simple rectangle, use the Rectangle command. To make an object interactive, such as a link (arrow) or title block, use the Object menu and click or press ENTER.

AutoCAD interface Advantages AutoCAD has many advantages over other CAD programs. The following are listed in order of relative importance.

1. AutoCAD is much easier to learn. A basic knowledge of the Windows operating system is all that is required. Although you will need to learn the AutoCAD commands, they are very easy to remember.
2. You can design complex mechanical and architectural drawings for buildings, bridges, and other structures from a single command. AutoCAD has a basic structural design capability that rivals that of many 3-D modeling programs.
3. You can share your drawings with colleagues and clients quickly and efficiently.
4. AutoCAD runs on virtually any type of microcomputer with a graphics interface.
5. AutoCAD comes in a variety of editions and versions, including native software and cloud-based versions for both Macs and Windows.
6. You can customize a number of its menus and buttons to meet your own preferences. For example, you can assign a shortcut to a drawing command or change the setting for a specific tool.
7. AutoCAD has an unlimited number of drawing layers. Each layer is separated from the next by a drop-shadow, which can be changed to a solid color. (See Understanding layers, pages -.)
8. AutoCAD supports Windows operating systems from Windows 95 and higher and all versions of Mac OS and Unix.
9. Although Autodesk developed AutoCAD as a desktop application, it runs on computers and mobile devices. For example, you can create, edit, and view drawings on your mobile device when you are out and about. (See Using AutoCAD mobile apps, pages -.)
10. You can easily send drawings to your web browser for viewing online.
11. You can easily share drawings with colleagues and clients.
12. You can share drawings with colleagues and clients through secure file transfer.
13. You can automate drawing processes.

CorelDraw is a commercial drawing application for Windows. Its core functions are AutoCAD compatible, although it does not have all of AutoCAD's features.

X-Cad X-Cad is a C++ based CAD environment developed by Synopsys. The X-Cad products are used to design PCB and ASICs, and in the automotive industry. The main features of X-Cad are: Product design via schematic and logic diagram Technical detail views Physical design visualization 3D Printing and CAM capabilities

The outcome of the 2019 State election has exposed the extent to which citizens have been taken for granted. We need to remember this State election was not a protest vote. The full manifesto of the ALP is a damning indictment of the Gillard Government. We now have the opportunity to turn this election verdict into a referendum on our values of equity and justice. The seven key demands of the Labor movement are a bold challenge to the current system which discriminates against

our citizens: We demand a Royal Commission into Aboriginal Deaths in Custody The Special Minister of State Brian Burke must provide Parliament with a copy of the latest annual report of the Australian Commission for Law Enforcement Integrity which, as we know, doesn't even mention the words "Aboriginal Deaths in Custody" in the whole document. But who would be surprised given that at least 180 Aboriginal people have died in custody since the dawn of the twentieth century. We need to know who is responsible for the most basic and elementary responsibility of the State - protecting our most vulnerable citizens. We demand an Independent Inquiry into Police Misconduct The Fair Work Ombudsman, the Australian Human Rights Commission, the Australian Federal Police, the Australian Crime Commission and the Office of Police Integrity all have the power to conduct such an inquiry. Let's start with what we have. A serious systemic failure has allowed a generation of people to be excluded from the protection of the law, and be subjected to the indignity of violence at the hands of police. We demand an Independent Ombudsman to deal with complaints about the police The current Police Complaints Authority is not sufficiently independent from the police. As long ago as 2009 a report of the Australian Law Reform Commission warned that the P.C.A. is undermined by the fear that "it will be seen to act as a free-fire zone for disgruntled police
