Even though the biggest deal in my life has been the postgraduation of my students, even though I had my own personal issues going on, the biggest deal was losing my family. I was used to having my family around all the time. I think when I started teaching, I even got used to the idea that I'd have a family around, but the biggest thing I had to get used to when I started teaching was going to school without my family. I couldn't get used to that. The hardest thing is when I would have to talk to them on the phone. When they were in school, I got to spend all day with them. Then, they'd go away for the summer, and I wouldn't get to see them anymore. There was a part of me that was missing them all the time. What made you get involved with math from an early age? I liked doing math from a really young age, but I was also very stubborn. I liked a lot of what I saw in my parents' life, and I didn't want to be like them. So, I just didn't do anything. If I did try, I would always fail. So, I just gave up. When I went away to college, my father was my math teacher. He gave me the opportunity to be interested in math. It was something I wasn't ready for. I couldn't get interested in it. I kept doing it, and doing it, and doing it, and doing it, and then I was in my

We demonstrate a new scheme of dispersive-assisted two-photon interference in a laser cavity, which leads to a narrow-line comb spectrum covering almost the entire spectral range of an externally applied laser field with ultranarrow spacing. The combs are directly generated from a single active interferometer and can be tuned by varying the laser phase difference. The method is robust and requires no active elements, which is especially beneficial for solar-type frequency combs.Q: How do I get the output of sh from Java program? I have a java program that I have the user input the sh code which I need to run. I am having trouble getting the output of the code as a string. If someone could help I would greatly appreciate it. A: As JB Nizet mentions, the recommended way to do it is to use a Java ProcessBuilder object and call its waitFor method. This will block until the process terminates, and will return the output. If you want to do it all in Java, you could call Runtime.exec() and capture the output, or just throw an exception and let the Java ProcessBuilder do the waiting and capturing. San Francisco Mayor Ed Lee, who was previously known for his advocacy of affordable housing, reversed course Wednesday by introducing a plan that would raise new taxes to pay for housing for the homeless. The move comes after criticism that he had done nothing to address the housing crisis in a city that
